

Justin Schaper

Justin Schaper is the Senior Vice President of Analytics at Intermedix. With a focus on improving provider performance and organizational operations, Schaper oversees the organization's predictive and prescriptive analytics tools and services. He has 28 years of information technology experience. Prior to his current role, Schaper served as the Intermedix vice president of practice management. He led the creation of the company's provider business intelligence solution, including the Tool for Optimizing Provider Schedules, or TOPS, which uses granular data and statistical modeling to address the staffing challenges faced by emergency department medical directors. Before joining Intermedix, Schaper held the position of Chief Information Officer at PSR. Schaper studied theoretical physics at the University of Colorado Boulder.
